Mr. Kurt Frenhel  
8 Yarmouth Gardens  
Toronto 4, Ontario

Dear Mr. Frenhel,

Mr. Ramsay informs me that you are willing to handle the Comet and Nova Section at the Toronto Centre, and take part in the National Programme. I will enclose the forms used in this programme, and perhaps several members would be interested in taking part in the C & N section. I understand the Toronto Centre has made a number of observations of Comet Seki-Lines, so it seems that it was well observed across Canada.

The enclosed forms should be self-explanatory, but if there are any problems, please let me know about them. Will the Toronto Centre be interested in taking part in the "Search" part of the programme?

Best wishes to you and the Toronto Centre. I hope to hear from you soon.

Yours truly,

*Jim Low*  
Jim Low

P.S. If you wish more forms, just ask for them.

JL
