

411 Brixton Avenue  
St. Lambert, P.Q.  
June 10, 1962

Dear Bob,

Thank-you for your letter of April 24. I am sorry that I did not write sooner, but work on the Comet and Nova Section display for the Edmonton meeting kept me busy.

I am happy that several members of the Victoria Centre will take part in the "search" part of this programme. Enclosed are a few forms, and when you need more, just let me know.

Did many members of your Centre see Comet Seki-Lines? If so, could you please let me know some of the details of the observations? By the way, another comet is coming into view--- Comet Humason (1961e). It should reach magnitude six, but I will send out more details in "Announcement #4" which should reach you soon.

Best wishes to you and your Centre.

Yours truly,

Jim Low
