Mr. Warren Creighton
703 Broadway Avenue
Vickers Heights
Ft. Williams, Ontario

Dear Mr. Creighton,

Miss I. K. Williamson tells me that you had some good luck with Comet Seki-Lines, and that you made a number of observations of it. As national coordinator of the Comet & Nova Section of the Royal Astronomical Society of Canada, I would be interested in the results you and the Lakehead Astronomical Society got.

Enclosed are the forms used in the Comet & Nova Section; perhaps you and your society would be interested in cooperation with this programme. Also enclosed are the latest bulletin and announcement. If you are interested, I will put your society on my mailing list for bulletins and announcements.

Best regard to you and your society; I hope to here from you soon.

Yours truly,

Jim Low
