Dear Mr. Maclean,

Thanks for your letter of August 20 and for the fine observations and search reports. Yours is the first report of Comet Humason received by me. I failed to see Comet Humason myself. At present, I am working in northern Canada where the summer sky is usually cloudy, and even when it is clear, the comet is lost in the horizon haze. I last looked for it on Sept. 1/2, but failed to pick it up---but it was very close to the southern horizon. Southern Canada should have a fairly good view of the comet, however.

Give my best regards to Mr. Gardner, I hope his health improves soon.

Best regards to you and the Centre, and good observing.

Yours truly,

Jim Low
