

Dec. 14, 1962.

Dear Jim:

That you would like to see the enclosed.

You missed a whopping good lecture last night! Dr. Van den Bergh from David Dunlap Obs. Subject "Evolution of Galaxies"-- with some beautiful slides.

We had a delightful evening after the lecture at Mde. Jean's home p-l-u-s cake & coffee, topped by a most unusual liqueur made from 'violets'. The color was really the prettiest violet and the taste was just like you might imagine a violet would taste!

Happy holidays! When are you coming to Montreal? It has been a long time since you've been here.

A couple of weeks ago, Earl Milton visited the Obs.

Sincerely,

Dot
