Dear Mr. Low,

I'm sorry I have not been able to answer your letters until now, but we're very pleased to get the information on comets & nova that you sent us. Will you please continue this information as our planetary observation groups are very interested & we'll do our best to get some reports in to you.

Weather conditions have been very poor in this part of Canada this spring & we've only had about two decent nights since Mar. 1. but we should get better weather very soon.

Thanks again for the information, we'll publicise it in our monthly news letter.

Regards,
Her Drew
