Dear Mr. Low,

I am an unattached (as yet) member of the R.A.S.C. (student), and am interested in the Comet and nova search program. This fall I am entering the University of Toronto ^(Engineering School) and do not know how much time I can devote to observation for the next few years but would appreciate getting the bulletins and announcements. I have started doing considerable astrophotography and was wondering if this would fit into the program. Thank you.

Sincerely Yours,
David Post
