St. Lambert, P.Q.

Dear Sir:

Enclosed are the negative search reports for December 1963. Like November, this was a poor month.

Nova Hercules 1963 was missed entirely. My north west horizon has city lights shining on "Foundry Fog".

He's hoping for better luck next month (FEB.).

January is nearly half gone and only five nights have been suitable so far. Tonight I checked area *1 but missed *121 & 220 due to ground haze.

The lunar eclipse of Dec. 30 was clouded out here. I did get a short peek at it around 7:30 A.M. through a small rift in the clouds.

Best regards - and good wishes for 1964 -

Hugh Maclean,
Niagara Falls Centre.

P.S. Thanks for the Christmas Greetings.
