

411 Brixton Avenue  
St. Lambert, P.Q.  
February 21, 1964

Dear Terry,

Enclosed are the latest Nova observations I have received. Note that Mr. Morgan has reported observations of the 1960 nova also.

I got up early Monday morning to look at the nova. Do you know if there is a new chart for this area, as the present AAVSO chart I have shows very few stars for less than tenth magnitude?

Have you received any other estimates of Nova Herculis, and if so, could you please send me a list of some of the magnitude estimates?

Will you be in Ottawa for the General Assembly in May? Perhaps I will see you there, as I hope to be able to attend at least part of it. I am a shift worker, and do not know if I can get time off then. The Dept. of Transport still wants its' weather maps plotted!

Best regards, and good observing!

  
Jim Low
