

411 Brixton Avenue
St. Lambert, P.Q.
March 14, 1964

Dear Mr. Diedrich,

Enclosed is a summary of searches made during January 1964 by members of the Royal Astronomical Society of Canada. I understand that Mrs. Yane is reporting searches made by Montreal Centre members now for areas 1 to 175. Since this section searches for both comets and novae, the whole sky has been divided into areas.

I mailed you my latest bulletin, and copies of the forms used by this section a few days ago. If you have any questions, please let me know.

I will attempt to mail you a summary such as the one enclosed each month.

Best regards, and good observing,

Jim Low
