November 20, 1964

Dear Mr. Maclean,

Thank-you for your observations of the past few months. I must apologize for not writing sooner, but I have been involved in other astronomical activities, and time just seems to fly by!

Under separate cover, I am sending you a supply of C&N forms.

I must congratulate you for following the nova for so long. I last observed it in February, but since then it has been too difficult to make satisfactory observations through the haze that always exists around Montreal.

Best regards, and good observing,

Jim Low
