102 Roy Avenue,
Apartment 102
Dorval, P.Q.

Dear Sir:

Enclosed are negative search reports for
December 1964.

No observations were made of Nova Kometis 1963.

This was not a very good month for viewing.
The Niagara Falls Centre held a very enjoyable gathering
on the night of the Lunar Eclipse. The weather was very
good, although fairly cool. I was quite busy and actually
forgot to examine any of my areas which were in view.

Earlier in the month I picked up a dandy
cold which kept me indoors for quite a spell.

To-night was the first good night of 1965 and I
had a look at a couple of areas.

Best wishes for 1965 and thank you for
your nice card.

Sheple W. A. Maclean.

P.S. The C+M Forms #2 were received OK.
