

Here are my three ONLY LUCKY observations of COMET IKEYA-SEKI (1952) I could make according to if not 6-D ROTTEN weather we had here in Quebec City... 10 minutes of time in more than ¹⁰ MONTHS....

ALL for EPOCH... 1950

1ST 1965 Nov. 2^d 10^h00^m (U.T.)

R.A. 12^h13^m d-19°08'

Mag. +3.7 TAIL 30° LONG to NAKED-EYE

2ND 1965 Nov. 4^d 10^h00^m (U.T.)

R.A. 12^h05^m d-20°23'

Mag. +4.2 TAIL 17° LONG to NAKED-EYE

3RD 1965 Nov. 5^d 10^h00^m (U.T.)

R.A. 12^h02^m d-20°39'

Mag. +4.4 TAIL 15° LONG to NAKED-EYE

PHOTO Observations made at Quebec City by: Jos. Matte

FROM +47°51' LAT. NORTH

JOS. MATTE, R.A.S.C.
750 Ave. Clairmont
Quebec City 10, P.Q., Canada

On the PHOTO the TAIL is almost 30° LONG

• We took the PHOTO at the same time I made my 3RD observation TAKEN by Dr. Paul Héroux + YVON Dufour using Giffault local length 55 mm open at F12.8 with Film TRI-X exposed for 5 minutes at 10^h00^m (U.T.) Thanks. Jos. Matte
