Mr. James W. A. Low,
108 Roy Ave., Apt 102,
Dorval, Que.

Dear Sir;

I have given much consideration to your request that I accept the position of National Co-ordinator of the Comet & Nova Section, and I am afraid I must decline it. Your confidence in me is appreciated, and I sincerely wish I had the time to do it. Holding office in three other organizations uses up more time than I can spare now.

The negative search reports for April & May, 1966 are enclosed.

I was able to spot Nova Hercules 1963 on April ~~17~~ 17, and May 25 - it seems to be staying at 14^m. 0. It is very difficult to see, and requires a clear sky with the Nova fairly well up.

Best Regards.

Hugh W. A. Maclean
