August 17th 1966.

Mr. J. Lowe,
National Coordinator - Comet & Nova Section,
Box 172 A.M.F. Postal Station,
Montreal International Airport,
Dorval, Que.

Dear Mr. Lowe,

Comet Kilston - 1966b.

This will acknowledge receipt of bulletin announcing the appearance of this Comet.

Amongst the members of the Victoria Centre I know of very few who make systematic observations, other than Mr. G. Ball to whom I have given the ephemeris, and who will follow up.

I made a search in the area indicated last night, but found no object which I could identify as the comet. The area is quite "well populated" with faint stars with which I must familiarize myself. My wife and I will continue looking. If other members of the Centre show interest I shall most certainly supply them with ~~information~~ the information which you may supply.

Kind regards,

Sincerely,

Edwin E. Bridgen
Edwin E. Bridgen.

P.S. Nova Reports. My wife sent hers to Montreal
(Mrs. Jane) Should they now be sent to you?
E.E.B.
