August 17, 1966

Dear Mr. Gerasimoff,

Thank-you for your letter of August 15, requesting information on the Comet and Nova Section. Enclosed are copies of the forms used in this section, including the negative search report form. They should be self-explanatory, but if you have any difficulties, just let me know. I have also enclosed copies of the last couple of "Bulletins" issued by this section.

Please note the new postal address as above.

There is a new comet in the sky, around 9th or 10th magnitude --- so it may be seen in small telescopes. I have no ephemeris yet, but it should be in Hercules near R.A. 18h, Dec. 15 to 20⁰N during the next week. I may send out an announcement if it becomes much brighter.

Good observing,

Jim Low

P.S. What equipment have you, if any. Binoculars, telescope?
