(JOE RICH ROAD)

Dear Mr Low

I see from <sup>the</sup> astronomical  
journal you study in Comets and nova  
I can <sup>not</sup> now remember just what constellation  
Sirius (dog star) is in or near, have  
you anything on this? I have several  
issues of the American Ephemeris and  
Nautical Almanac, 1907-1910 but  
see no reference to Sirius at least by  
that name. By it the Egyptians timed some  
of their years. I have forgotten just at what  
time it rises and the constellation it may  
be in. I have the impression it may  
be an essential factor in determining  
the proper year. The Jews have a very  
clever time arrangement, but neither  
Scripture or astronomy allow for  
a thirteen month year. Nor nature either  
for this earth produces vegetation  
definitely connected or related to the  
seasonal points. (Equinoxes and Sol-  
stices) the moon exerting power  
and influence also. Ill try and  
illustrate some things I see  
HENRY COOPER

(scripture) a nail in a sure place, (on Him are hidden all the treasures of wisdom.)

The astronomical new moon, and ecclesiastical new moon. Can be located from here, in addition we know where to begin in counting the vernal Equinoxes in order to ascertain the two year cycles, jubilees, and etc etc. We know which is the true Sabbath from here and which is the counterfeit. all we like sheep have gone astray. This day also locates the High Sabbath in the year and how to number them, and which Sunday is holy and which is not.

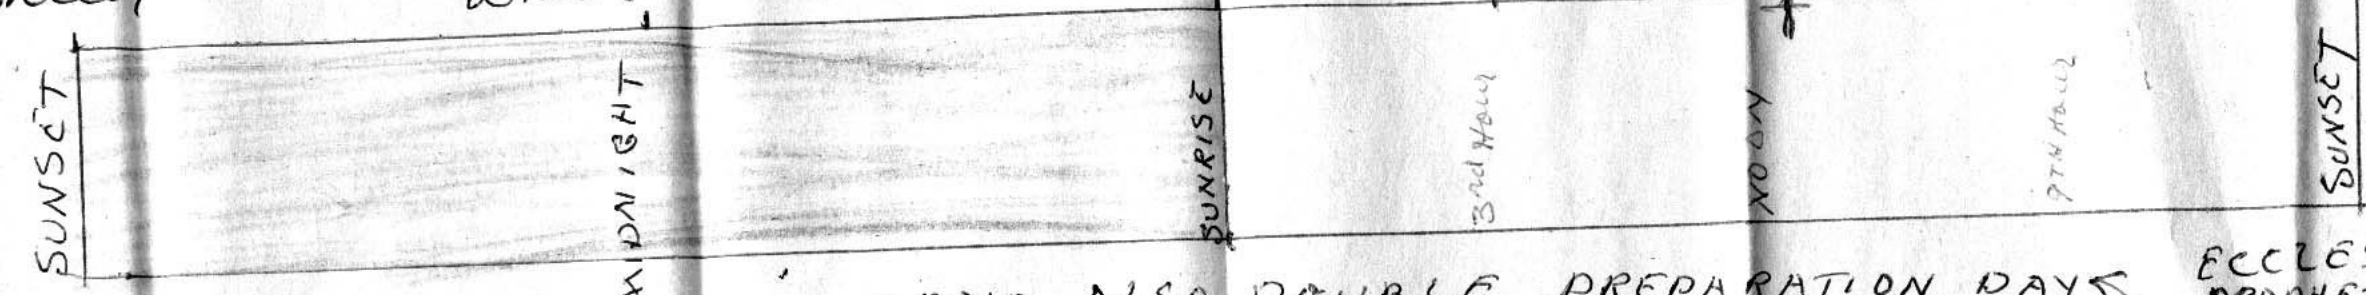

1<sup>st</sup> DAY OF UNLEAVENED BREAD ALSO DOUBLE PREPARATION DAY ← ECCLESIASTICAL PROPHETICAL AND ETC

Sixth Day of week and also fourteenth day of first month (nisan, abib) solar and lunar time. The Sunday following the High Sabbath is always wave sheaf and from it 50 days later we locate pentecost Sunday (Feast of Weeks)

know which is the true Sabbath from here and which is the counterfeit  
 Due like sheep have gone astray. This day also  
 cates the High Sabbath in the year and had to  
 number them. and which Sunday is holy and  
 which is not.

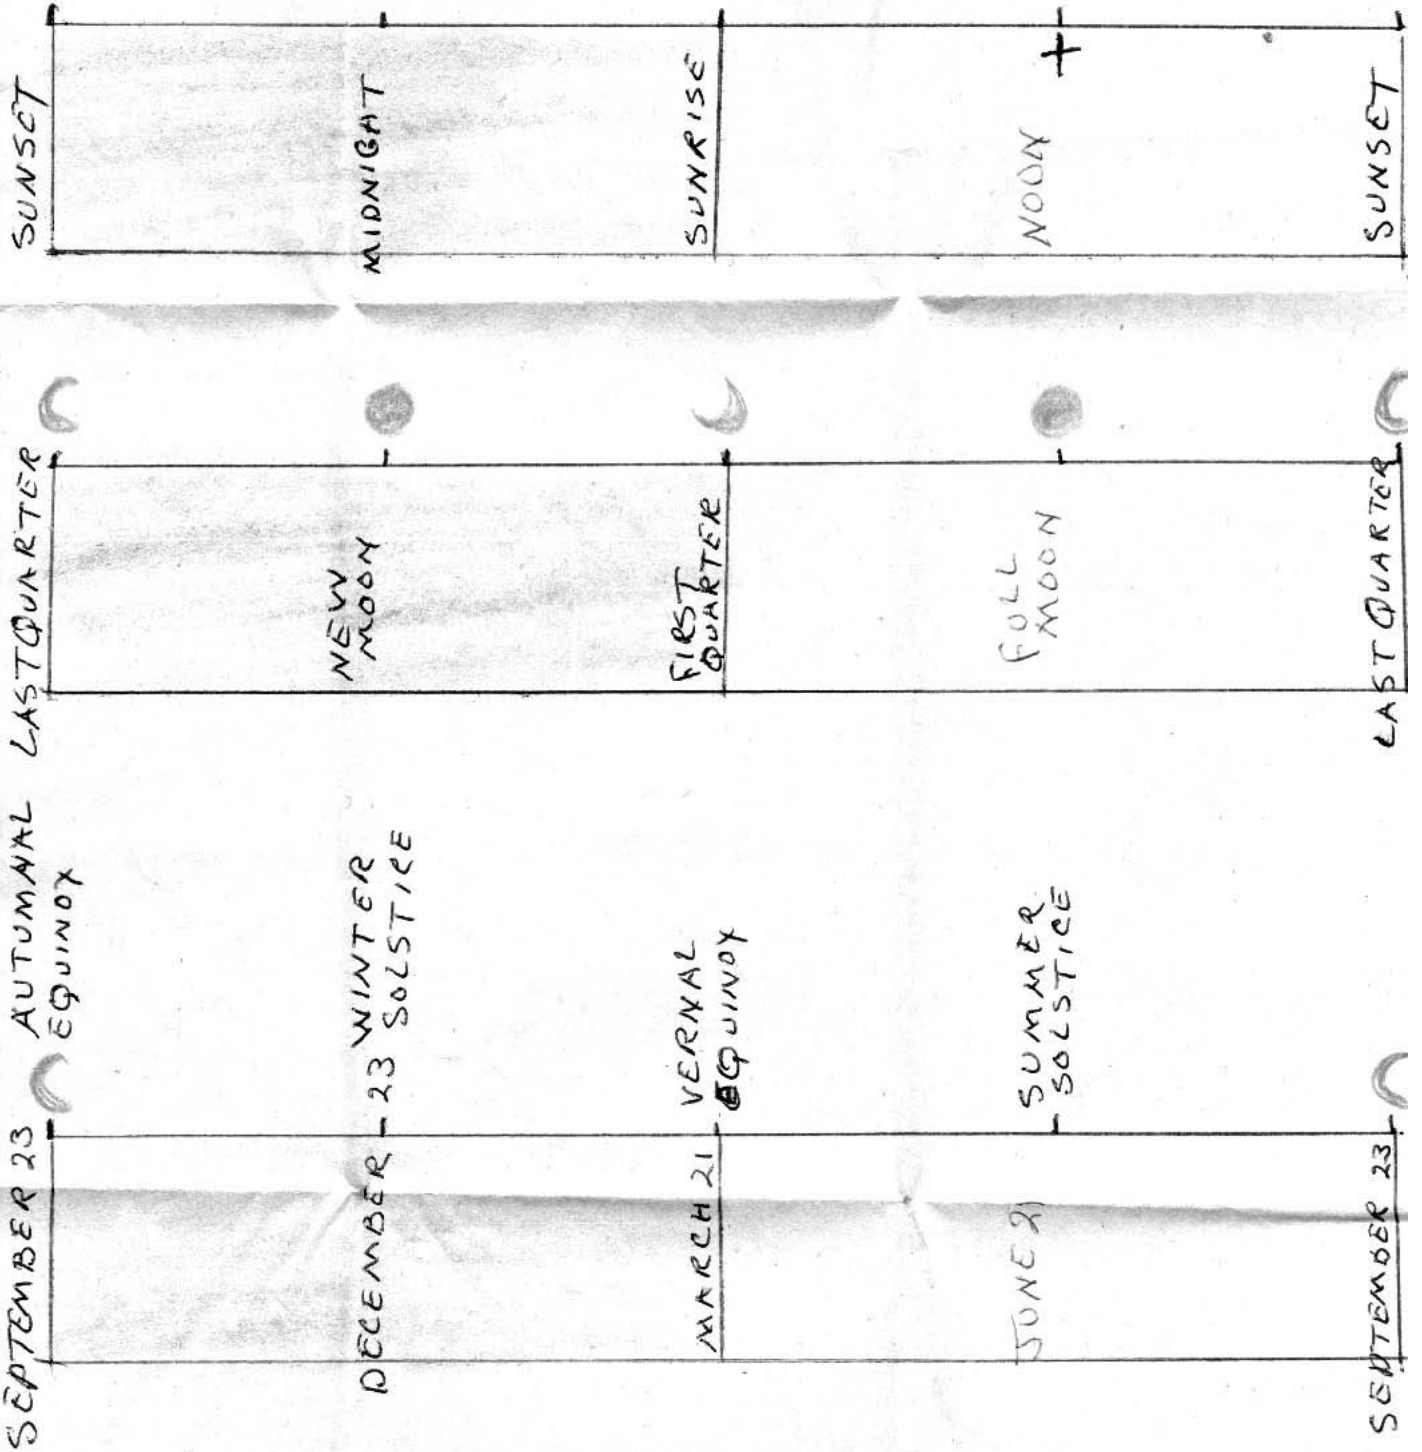

FRIDAY APRIL 3 33AD  
 TOTAL LUNAR ECLIPSE

1<sup>st</sup> DAY OF UNLEAVENED BREAD ALSO DOUBLE PREPARATION DAY ← ECCLESIASTICA PROPHETICAL TIME AND ETC

Sixth Day of week and also fourteenth day of just month (reason, club) Solar and lunar time  
 The Sunday following the High Sabbath is always wave sheaf and  
 from it 50 days later we locate pentecost Sunday (Feast of Weeks)  
 and 352 days later we find the years end. plus 13 days previous equals  
 365 days or one solar year. no human or group of humans could  
 continue such an intricate plan: so that it would synchronize with  
 planetary action and etc: only Divinity has such power and wisdom  
 See reverse Side of Sheet Henry Cooper

PURE NATURAL TIME

not to be confused with Jewish sacred or civil years, month and etc  
 These things are cleverly concealed in  
 astronomy, scripture and etc

Henry Cooper
