Presents

*No place like home: our changing Solar System*

From the historically wet environment of Mars to the methane lakes of Titan, exploration of our Solar System is showing that science fiction continues to become science fact. The exploration of our Solar System continues at an exciting pace with new probes of discovery being launched every year.

This presentation will focus on some of the recent science returns for our own celestial backyard and will include some commentary on the change to the planet definition that occurred in 2006.

*Paul Delaney, Professor of Physics and Astronomy, York University*

**Date:** Saturday 14<sup>th</sup>. April 2007

**Time:** Dinner @ 6:00pm. Speaker @ 8:00pm.

**Place:** Delphi Hall 2 4414 Portage Road, Niagara Falls ON.

**Cost:** \$45.00 / Adult. Dinner and Lecture  
\$30.00 / Child under 13

**For tickets and information call:**
